

Specifications

MAP (Monitored Access Panel)

High Security Application

Functionality

The AMS Australia monitored access panels are designed for high security applications in ceilings and walls. The panels are engineered to meet high security specifications that include SCEC endorsed products to monitor lock status and fits all end of line modules.

Construction

3mm mild steel construction with weld-in hinges.

Components

- SCEC endorsed AMS MSB62-10 microswitch box
- SCEC endorsed Lockwood 35791 deadlock
- SCEC endorsed Chubb triple reed (optional)
- Balanced gas struts to support door - 210n
- Concealed secure fixing
- Supplied with standard C4 broach cylinder and 2 keys (will take restricted cylinder)

Dimensions

Opening access dimensions 450mm x 450mm

Ceiling cut-out required – 460mm x 534mm

Colour Finish

Powder coated in white.

Fitting requirements

A solid section is required around the ceiling aperture to mount the MAP. This is in the roof space side.
