

Single Blocker Plate

AMS SBP-01

The AMS Single Blocker Plate (AMS SBP-1) has been designed to work with outward opening timber doors that require a single lock blocker plate. This product has been developed to reduce the risk of a door attack.

COMPATIBILITY

- Works in conjunction with all electric strikes
- Works in conjunction with all good quality mortise locks

CONSTRUCTION

- 2mm stainless steel
- Seam welded
- Welded studs
- Two-way fixings for added strength and security.

DIMENSIONS

- 300mm long

INSTALLATION

- Installation template included
- Comes with fixing screws

APPLICATIONS

- Suitable for most outward opening timber doors with a minimum thickness of 32mm

Made in Australia
