

High Security Door Solution - HSDS

The AMS Australia **High Security Door** is a complete security solution in one package. The door and the hardware are pre-fitted and wired in the factory which means that less time is required on site. The “H” frame has adjustable legs so it can be bolted into slabs of varying heights so there is no need to have defined height dimensions. The door is a composite of steel and wood. The main door is made up of 30mm x 30mm RHS steel clad in perforated steel with extra strengthening around the locks.

STRUCTURAL FEATURES

- 125mmx75mmx3mm RHS “H” door frame
- 50mm thick timber clad steel door
- Adjustable legs to “H” frame to allow slab to slab fixing
- Frame can be mortar filled for added security
- All security devices pre-fitted and wired in factory
- Full length strike shield made of 2mm stainless steel
- Stainless steel capping around the edge of the door
- Full length hinge (hinge bolts included)
- Secure under door seal
- Built-in architraves to accommodate plaster board so no stopping is required
- Options:
 - Can be produced in various sizes and door finishes
 - Can be produced with various security equipment as required

HARDWARE INCLUDED

- AMS MSB62-10 lock monitoring box
- SM3 balanced reed switch
- FSH 20M electric strike (10mm lip)
- FSH FEM 5700M magna lock
- Geze TS 5000 door closer
- DLLH-46– dual lock lever handle in stainless steel
- Lockwood 35791 deadbolt
- Lockwood 35792 deadlock
- Concealed acoustic seals
